

ArcticUNI

Premium Marine Calcium Supplement from Northern Norway 69°N

Marine minerals from sustainably harvested sea urchins with full batch traceability and a consistent mineral profile.

Why ArcticUNI fits Korean partners?

Marine-derived calcium: (calcium carbonate) + naturally occurring trace minerals

MFDS-aligned raw material status: Sea urchin species listed by Latin name; positioned for HFF (Calcium) compliance (standardized nutrient route)

Built for long-term partners: clear positioning, stable supply, scalable volumes
